June 2024

**WATS Feature Release Note
Asset Manager & Asset Types 24.2**

Major Feature Areas

What's new?

Asset Grid

- Allows the flexibility to show or hide columns in the Asset grid, offering you a customized view tailored to your preferences.

Asset counters and limits

- Ability to set the last calibration or maintenance date and time on reset, giving you more control.

Tags

- Able to add duplicated tags.

Attach files

- Attach files directly to assets for enhanced documentation and references.

Change log

- The change log has been enhanced to include calibration and maintenance resets, providing a comprehensive history of asset modifications.
- Improved tracking of running and total count increasement.

Improved permissions

- "Asset Manager" permissions grant access to the module.
- "Write" permission allows editing the asset.
- "Delete" permission enables asset deletion.
- "Edit counters and limits" permission empower users to adjust counts and reset limits.

Asset Types

- Introducing a new permission level, Asset Type, which grants access exclusively to asset types for more precise control over asset management.
