WATS Feature Release Note
Repair analysis

Major Feature Areas

General

Updates and enhancements have been made to the Repair & RMA reports in Analytics to improve performance and the overall user experience. The Dynamic Repair, Product Repair and Component Repair – reports are no longer in preview mode and as a result the legacy Repair Analysis report has been removed.

New features

Dynamic repair views

- As with the Dynamic Yield report, users will now be able to keep multiple configurations of the Dynamic Repair report as views.
    - Users can access and manage their views directly in the Analytics menu.
    - Views can be shared between users and recipients can opt to save the shared view as their own.

Dynamic repair dashboard widgets

- The Dynamic repair grid and Dynamic repair charts are now available as dashboard widgets.
    - Widgets can be added directly from the Dynamic Repair report or from the widget toolbox.
    - From the Dynamic Repair widgets, users can now open the Dynamic Repair report with a configuration matching that of the widget and with the option to save it as a view.
